

The parametric equations of a curve are $x = \frac{1}{\cos t}$, $y = \ln \tan t$, where $0 < t < \frac{1}{2}\pi$.

(a) Show that $\frac{dy}{dx} = \frac{\cos t}{\sin^2 t}$.

[5]

[illegible]

(b) Find the equation of the tangent to the curve at the point where $y = 0$.
